

# Works just like a networked office copier or laser printer – but burns and prints CDs, DVDs and Blu-ray<sup>™</sup> Discs!

Primera is well-known for its broad range of best-selling and award-winning desktop CD, DVD and Blu-ray<sup>™</sup> Disc publishing systems. With its new Disc Publisher XRn, Primera now offers the most reliable, advanced and affordable network disc publisher.

## Network Disc Publishing from Primera – the industry's leading solution provider!

Disc Publisher XRn is a high-performance, enterprise-class machine that's been designed for use in the most demanding, "mission-critical" environments:

- · Healthcare records and medical imaging
- Retail and kiosk-based "disc-on-demand"
- · Networked disc publishing in medium- to large-sized offices
- Billing and insurance and much more

Disc Publisher XRn allows users to burn and print discs from anywhere on the network. Easy to use client software is installed on each workstation to format discs, attach data and send jobs to the disc publisher.

The front-panel keypad and back-lit LCD give convenient, localized control for job status and maintenance.

Discs can be dispensed out the front of the unit or stacked inside the locked front door for security. You can even load blank CDs in one input bin and DVDs or Blu-ray Discs in the other and remotely select which type of media to burn – a unique feature not found on other brands.

The built-in Windows<sup>®</sup> XP Embedded operating system can be configured to your network in just seconds. To increase capacity, simply add more units and control them from the same software.

### The Best-Looking, Most Robust Discs

Blank CD, DVD and Blu-ray Disc media that is highly water-, scratch- and smudge-resistant is available along with standard and inexpensive inkjet printable media. Print resolution, at up to 4800 dpi, produces output that is far superior to other methods of ondemand, direct-to-disc printing.

### **Professional Sales, Service and Support**

The Disc Publisher XRn is available worldwide through a network of factory-trained and certified resellers, distributors and select OEMs.
