**Duplicate up to seven discs at a time!**

- Easy To Use
- No PC Connection Required
- Professional-Grade  
Plextor® Recorders
- Aluminum Case & Chassis
- The Industry's Lowest  
Reject Rates

### Copy CDs and DVDs Fast and Easy

Primera's new DUP-07 copies up to seven CDs or DVDs at a time at the fastest speeds currently available. All current formats are supported, including CD-R, DVD-R, DVD+R and even DVD±R Dual Layer.

### Easy To Use

Place a master disc in the top drive, load up to seven blank discs, and press "AUTO COPY." In just minutes, you'll have seven perfect copies of your data, music, video or virtually any other digital information.\* A built-in 80GB hard drive allows you to store jobs for later use.

### Many Applications

Tower duplicators – as opposed to disc publishers like Primera's Bravo II or BravoPro – are typically used when many identical copies are required in a very short period of time. Churches, schools, service bureaus, live events and concerts as well as many other users find this to be their best solution.

### Optional Manual or Automated Printing

Use one of Primera's award-winning direct-to-disc printers to pre-print your discs for the fastest throughput. For low-volume, one color manual printing, choose the Signature® Z1 CD/DVD printer. For higher-volume, full color automated printing, choose the Bravo II™ AutoPrinter (50 discs) or BravoPro™ AutoPrinter (100 discs).

### Reliability and Long Service Life

The DUP-07 uses a unique, aluminum chassis and frame while most other tower duplicators use painted steel. Aluminum is more expensive, but more efficiently dissipates heat. This important difference translates into longer life of the recorders as well as other components inside your new duplicator.

### Technical Specifications

<b>Drives:</b>	One CD/DVD-ROM, seven Plextor 716A Premium CD/DVD Recorders
<b>Drive Speeds:</b>	48x CD-R, 16x DVD±R, 8x DVD+R DL
